The Butler County Family & Children First Council

Is a collaborative of public and private child and family-serving systems, entities, and families. We support initiatives that increase the likelihood that children can grow up safe and healthy, surrounded by support of their families and communities.
Established in 1993, Ohio Family and Children First (OFCF) is defined as the Governor's Children's Cabinet with the purpose of streamlining and coordinating government services for children and families. The OFCF Cabinet Council is comprised of the following Ohio Departments: Aging, Developmental Disabilities, Education, Health, Job and Family Services, Medicaid, Mental Health and Addiction Services, Opportunities for Ohioians with Disabilities, Rehabilitation and Correction, Youth Services, and the Office of Budget and Management. Locally, the county commissioners establish the 88 county Family and Children First Councils (FCFC).
Care Coordination
- Early Intervention
- Wraparound

Coalitions
- Prevention Coalition & Addiction Taskforce

Collaboration
- Parent Project
- Pause Respite
- Transition Age Youth

The CDC-Kaiser Permanente Adverse Childhood Experiences (ACE) Study is one of the largest investigations of childhood abuse and neglect and household challenges and later-life health and well-being.

The original ACE Study was conducted at Kaiser Permanente from 1995 to 1997 with two waves of data collection. Over 17,000 Health Maintenance Organization members from Southern California receiving physical exams completed confidential surveys regarding their childhood experiences and current health status and behaviors.
ACES are linked to risky health behaviors, chronic health conditions, low life potential, and early death…

BUT…

Resiliency Can Be Taught

Adverse Childhood Experiences (ACEs): Impact on brain, body and behavior
